Your experienced and competent partner for health care

## Software

The user-friendly software Checkpoint DRG is the ideal compound for health care providers, medical reimbursement services and health insurance companies for processing audits for case management. Decide in favor of individual case transparency beginning with case admission and ending at claims management.

Our Checkpoint DRG enables you to administer individual cases easily and electronically and is a perfect instrument for depicting services and revenue compensation.

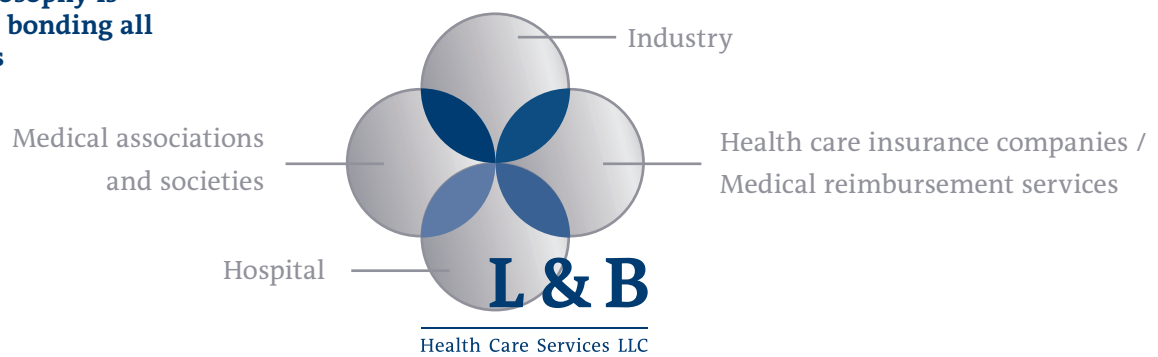

## Consultation

Our expert staff is committed to providing comprehensive consultation services ranging from quality and process management, DRG training and auditing services to innovative approaches in managing health care.

## DRG auditing services

Our long-term experience with DRG systems permits us to conduct DRG audits efficiently and on a high level while keeping costs low. Our software checks diagnosis and procedure codes and links these to validation rules that are based on various code sets (e.g. ICD codes). In addition, we make sure that all cases are comprehensively examined for medical plausibility by experienced physicians, nursing staff, and medical coding specialists, thereby allowing us to carry out efficient workflows.

## Our company philosophy is building trust and bonding all health care parties

## Comprehensive build-up of disease registries

We are engaged in the development of patient registries for rare diseases such as Acromegaly, Neuroendocrine Gastrointestinal Tumors, Cushing's Syndrome and Periprosthetic Fractures. Our expert staff has many years of experience in applying high-end IT applications for building customized and secure databases and possesses extensive knowledge in the medical and care giving areas for capturing and evaluating patient data on all levels.

## Case management for psychiatric and psychosomatic illness

On behalf of health insurance companies and medical reimbursement services, we examine and accompany inpatient and outpatient care and treatment for psychiatric and psychosomatic illness. Our aim is to offer well-founded economic solutions for health care service providers while considering and providing optimal health and social therapeutic care for patients.

## Intensive Case Management (ICM)

We offer intensive care management services for our clients and subsequently the patients. Our health care service methods are comprehensive and embody a complete holistic approach in all service areas. The ICM team performs and provides well-structured, carefully planned analyses and develops individual custom care plans for the patient. By aspiring to improve sustainability for a special patient care service, we make sure that the patient is provided with the appropriate therapy and outpatient medical care.
